

HYBRID DISABILITY PROGRAM

VACORP is proud to offer a disability benefits program for Virginia Retirement System Hybrid Retirement employees.

This program was established in response to legislation creating the VRS Hybrid Retirement Plan, which requires public entities to provide employer-paid disability insurance for employees hired after January 1, 2014. Governing bodies that opted out of the Virginia Local Disability Program are required to provide a comparable plan of long-term and short-term disability insurance. We provide the comparable plan for you.

Our Solution

Our Hybrid Disability Program claims are administered by Standard Insurance Company. All public entities that participate in the VRS Hybrid Retirement Plan are eligible to participate in this program and are not required to join our risk pool. Short Term Disability insurance is self-funded by the participating employer. If an employee remains disabled through the short-term period of 125 work days, then Standard makes the disability benefit payments.

The Benefit to You - Strength in Numbers

With more than 320 public entities in the program, we are able to provide the required benefits at highly competitive pricing, in addition to the exceptional personalized customer service you've come to expect from VACORP.
