

## RISK CONTROL SERVICES

**Our Risk Control team is here to assist with minimizing the risks throughout your organization.**

VACORP members have many risks shared by all, as well as unique risks for each member type. Each member also has exposures specific to their type of organization. The best solution to minimizing all of these risks and exposures is to know the sources and take proactive measures to mitigate them. And you certainly don't have to do this alone.

### Our Solution

Our Risk Control team has extensive experience in the operations of our members, which enables us to identify the risks and develop a plan of action. We empower our members with the knowledge and tools to implement effective controls.

### Customized to Your Needs

Our services are custom-tailored to meet the unique needs of each member. We have an extensive array of member-specific programs, including those for:

- Counties, cities, and towns
- Schools
- Law Enforcement
- Community Service Boards
- Corrections
- Authorities, including Water & Sewer

## Breadth of Services

Proactive Risk Control is the essence of pooling; members working toward the common goal of reducing risk. Our staff will work with you to help identify exposures that can impact your operations from a financial and operational standpoint. By working to protect your employees and property, each member can contribute to the pool's success and your organization's operational efficiency.

Consulting services are available for each line of coverage, including:

- Safety Consultation - Educating key member contacts about coverage, loss history, exposures, and strategies for reducing specific losses
- Accident Analysis and Reporting
  - Workers' Compensation & Property and Casualty "Summary by Year"
  - Workers' Compensation & Property and Casualty "Summary by Department"
  - Workers' Compensation & Property and Casualty "Type of Claim by Department"
  - Detailed and open claims analysis
- Management training to drive safety programs
- Assisting members with developing, operating, and leading safety committees
- Member training with a focus on employee training
  - Periodic training seminars tailored to address emerging issues
  - Customized training sessions at member site to address risk management, safety, and human resources training needs
  - Web-based computer training, which provides a great platform to provide ongoing employee safety, fleet, and human resources training
  - Webinars on a variety of emerging safety topics
  - OSHA training
  - Accredited law enforcement training
  - Safety video lending library
- On-site facility safety surveys
  - Comprehensive reviews of facility safety
  - Evaluation of work procedures, including job-safety analysis and ergonomics
  - Playground safety inspections
  - Fire and electrical
- Assisting members with development and review of formal, written safety programs, policies, and procedures
- Assistance with member focus on claims management since this process is an integral part of any risk management program
- Facilitate return-to-work and alternative-duty job descriptions
- Timely hazard alerts to assist members in avoiding real-life catastrophies
