

## LAW ENFORCEMENT TRAINING

**The selfless nature of our law enforcement personnel makes it even more necessary that they be trained to look out for their own well-being while also looking out for the safety of the citizenry.**

Law enforcement officers are always going to be in harm's way, no matter how safe we attempt to make their jobs. There's no avoiding that, and they accept that risk; however, we see an increasing number of preventable incidents that could have been avoided had appropriate training been in place.

### Our Solution

VACORP employs a team of dedicated Public Safety Specialists whose focus is solely our members' law enforcement agencies. This specialist, along with other members of VACORP's Risk Control team, provides law-enforcement training on several key areas, including:

- Wellness and physical fitness to ensure optimal performance
- Safety Awareness, including pictures, news reports and videos of incidents from our vast claims experience
- Driving Training, including driving simulator, which includes special considerations for pursuit-rated vehicles and other vehicles such as SUVs, motorcycles, ATVs and armored cars
- Injury and fatality statistical analysis, as well as accident trends based on claims reporting and other data
- Scenario awareness through prior and pending litigation where law enforcement is either plaintiff or defendant through our claims experience and national stories
- State law changes that affect law enforcement, as well as policy review
- Safety mindset and complacency, traffic-stop safety, arrest safety and safe transport of prisoners

For more information about this program, please contact:
