

# **SCHOOL CLASSROOM TRAINING**

VAcorp Risk Control Staff offers a wide variety of training and materials to support safe operations and reduce liabilities for school division members. Classroom training can be tailored to meet the needs of members and their internal departments. Most training topics will last approximately one hour. Training topics below are listed by department or where the training may be appropriate; where topics are identified more than once, the training's details will be modified to that area's specific exposures. For assistance with training or for additional risk management assistance, please contact your Risk Control Consultant.

## **OPENING CONVOCATION**
